TAMBANG

A new era in Indonesian mining has dawned. The inception of the new Mining Law in the industry's legal system is a longstanding call to certainty answered. Taking place against a milieu of strengthening economic activity, recent changes have created a new playing field for industry insiders. Access unmatched intelligence and forecasts to improve your investment decision-making at the **OzMine 2010 Exhibition and Conference** and move forward in the direction of sustainable mining in Indonesia.

**REASONS NOT TO MISS
THE
OZMINE 2010 CONFERENCE:**

- **Advance your contacts** by leveraging on the Australian Government's global industry network
- **Gain access to key contacts** in Indonesia, Thailand, Vietnam and the Philippines and representatives from leading mining procurement companies in Indonesia
- **Hear directly from the Indonesian Government** and discover the implications of the new Mining Law on exploration, minerals processing and the service sector
- **Gain an insight on Indonesia's regulatory landscape** at a provincial and local level with direct updates on investment opportunities
- **Explore the meaning of mining sustainability** in extending the life of your investment
- **Hear case studies and expert insights on CSR best practice** for existing, new and expanding projects
- **Discover financial mining project issues** for consideration
- **Be exposed to innovative developments** leading to improved results for your operation
